FOREWORD

This catalog indexes unclassified, unlimited reports published by the U.S. Army Construction Engineering Research Laboratory (USA-CERL) from its inception in 1969 through September 1984. The publications in this catalog are indexed in two ways: (1) chronologically under each major functional (research) area of the laboratory (the Functional Area Index) and (2) by detailed indexes produced by the Defense Technical Information Center (DTIC) (the Detailed Indexes).

The DTIC-produced Detailed Indexes are by subject, author, title, USA-CERL report number, and DTIC AD accession number. When using the Detailed Indexes, additional information on each publication (title, authors, dates, report number) can be found in the Functional Area Index. Refer from the AD accession number in the detailed subject, author, title, or USA-CERL report number indexes to the AD accession number index. The AD accession number index gives the USA-CERL report number and the page on which that publication may be found in the Functional Area Index.

USA-CERL publications are available for purchase, in either paper copy or microfiche, from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. The cost is \$5.95 for microfiche; paper copies vary in price depending on length; contact NTIS for exact price. When ordering, cite the AD accession number.
